

Advanced Nanotechnology!

DRIVEHARDTM PRO

Concrete & Masonry Weatherproofer

NewLook DriveHardTM Premium Concrete Weatherproofer is a professional grade concrete and masonry weatherproofer and fortifier. The patent-pending nano-silicone / lithium silicate formula creates a breathable, more durable and highly water repellent surface. It penetrates deep into the surface to create a chemical bond helps prevent damage from many common problems, including repeated freeze-thaw cycles, spalling, dirt pick-up and dusting. DriveHard PRO leaves a natural-looking finish that does not create a film or change the surface texture or color. Use DriveHard PRO to winterize your customers' concrete!

- **Permanently fortifies concrete & masonry**
- **Excellent water-repellent properties**
- **Prevents many common concrete problems**
- **Protects from water-borne salt damage & erosion**

APPLICATIONS & USES

Recommended for most concrete or masonry surfaces subject to deterioration and corrosion:

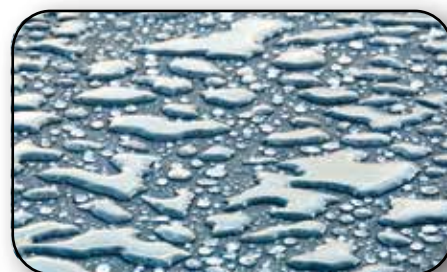

- Architectural or exposed aggregate
- Porous or dense brick, pavers or blocks
- Masonry capstones and walls
- Perfect for winterizing driveways, patios, and sidewalks!
- Protect integrally colored concrete, water fountains, pool decks, garage floors, retaining walls and patios
- Used in both interior & exterior

Available in 1, 5 and 55 gallon containers.
Covers approx. 200 sq. ft. per gallon.

Prevents & Reduces...

Excellent Water-Repellency

Reduces cracking, spalling, freeze-thaw damage, rust corrosion, white powder dusting (efflorescence) and dirt pickup!
